**LASA 2010 Conference: Crisis, Response, and Recovery**

The U.S. financial crisis of 2008 quickly became a global economic crisis. It destroyed jobs, increased poverty and disease, exacerbated social tensions, raised skepticism about the efficacy of democratic governance, led to policy experimentation, complicated efforts to deal with global problems multilaterally, and fueled civil and international conflict. The impact of the crisis in Latin America has varied from country to country, community to community, even neighborhood to neighborhood. In Latin America, the crisis was both reminiscent of previous crises but also different, in terms of transmission mechanisms, impact, and responses. Understanding the effects of the crisis, and the varied responses to it, calls for insights from multiple disciplines. Recovery, when it comes, will be shaped by the way citizens, governments, and international organizations understand the causes and consequences of the crisis itself.

**Dates:** October 6-9, 2010

11th Conference of the Americas

**Theme:** *Creative Agents of Changing: Facing Challenges in our Communities*

Featuring an Address by **Doris Sommer** (*Harvard University*)

**Dates:** November 4-6, 2010

The Cultural Agents Initiative at Harvard University investigates and promotes the role art and artists play in helping their communities deal with challenges of pursuing sustainable development, reducing social and economic inequality, and expanding accessible healthcare, among other issues. This has inspired our theme "Creative Agents of Change," with a focus on Latin America and the Caribbean, and Latino communities in the United States. We are particularly interested in the collaboration of academic institutions and community organizations. We wonder about the role of scholars as cultural agents, and their capacity to use the humanities, and physical and social sciences, to further build civil society, and offer innovative ways to address local challenges. And we are curious about existing bridges between community activists and scholars, and new ones that might be built. We invite proposals for papers, panels, workshops, roundtable discussions, exhibitions, or performances that address this relationship between academia and community, with a focus on any one of the issues below: Sustainable Development, Urbanization, Immigration, Gender Inequality, Environmental Security, Public Health, Emigration, Racial/Ethnic Inequality, Geohazards, Public Violence, Human Trafficking, Religious Divides.

We also invite presentations on the ways cultural agents have addressed these challenges, including the use of the arts (painting, sculpture, film, literature, theater and other art forms), historical narratives (oral histories, testimonials, counter-histories), and unconventional pedagogies.

Proposals may be in Spanish, Portuguese, French, or English (though we cannot guarantee interpreters for presentations in Portuguese and French). The proposal deadline is **June 1, 2010**.

Gap Year: International Study for Students & Teachers

Gap years, a common tradition in most parts of Europe, are becoming more and more popular in the United States and Canada. Students are feeling more comfortable taking a year off before starting or in the midst of university to get focused, and to gain some international exposure.

Strategic Decisions & Partnerships (SDPUS) offers distinctive “gap year” semester courses, all of which have been given academic credit in the United States and Canada. They are courses which couple adventure travel with basic humanity projects such as helping a disadvantaged Costa Rican school or by working with an ecological organization, such as “SAVE THE SEA TURTLES” in Las Baulas National Park.

This is a considerable advantage to your gap year or study abroad semester, because not only do you get to experience the most amazing parts of Central America, you also come out ahead scholastically and culturally.
