CONFERENCES/SEMINARS/LECTURES

Border Encounters in the Americas—LAGO Graduate Student Conference at Tulane University

Dates: February 13-15, 2014

For more information: <http://lago.tulane.edu/conference/>

At Tulane University's Latin American Graduate Organization's (LAGO) 2014 graduate conference, meet graduate scholars, faculty, and community leaders interested in Latin America across disciplines and experience the unique Mardi Gras season in New Orleans with the famous [Krewe du Vieux](#) parade set to roll on Saturday evening!

Theme: Latin America and the Caribbean are rich with cultural, linguistic, and geographic diversity which has historically made and continues to make the region an object of prolific scholarly study across disciplines. Produced within this diversity are the boundaries—both physical and abstract—between nations, languages, ethnic and racial identities, ecologies, and geographies. Figurative and literal borders are confronted each day as people move across regions, navigate between cultures, and communicate with others around the world; global capital crosses national borders, redefines local economies, and produces labor migrations; geographical landscapes shift as land becomes deforested or designated as protected. These various “border encounters” highlight the ways in which borders can both restrain and liberate the objects, people, or ideas that face them, a distinction that is often bound up with power and politics. This conference explores the notion of borders—their strictures, leniencies, and significance—in Latin America and the Caribbean.

Texas A&M University's Fourth Hispanic Studies Annual Graduate Conference—Translating Social Movements

Dates: March 21- 22, 2014

For more information: mariapoisa@neo.tamu.edu

Theme: The relationship between intellectual discourse and grassroots social movements has long been a contentious and conflictive one, but it is also one that has been shaped by mutual interaction. Just as the production of knowledge has formed and informed the direction of social movements, so have social movements themselves shaped the direction of intellectual activity throughout the years. In our global times, we are witnessing the explosion of social movements that operate outside the traditional modes of representational politics that has defined western modernity. So-called global justice movements such as Occupy, the Spanish *indignados* and Non-Governmental Organizations, local movements of a political nature such as the Zapatistas and MST, or trans-national ones such as the Arab Spring, global networks of commercial insurgency and crime, such as represent the War on Terror and the War on Drugs, even the expansion of religious and cultural fundamentalisms. As a border zone where, in the words of Gloria Anzaldúa, the third world grates against the first and bleeds, Texas is intersected by many such types of movements, by what Toni Negri calls the movement of movements. The 4th Hispanic Studies Graduate Conference seeks to take an interdisciplinary approach to the conditions which concern the *translatability* of such movements, movements which often exceed and challenge the apparatuses which try to understand, control or intervene in them.

The study of this region's history, politics and culture (at the global and national level in each country) is the object of this section. The coordinators of this Section work predominantly on analyses of present problems and on their projects toward the future. Date: April 25, 2014

For more information: <http://www.stonybrook.edu/commcms/lacc/events/conference.html>

Keynote Speaker: Brodwyn Fischer (Professor of Latin American History, University of Chicago) Since the conquest, Latin America has been a distinctly urban region, and yet urbanization has always been a process fraught with ambiguity and contradiction. From Pre-Columbian times, urban centers have served as central arenas for the contestation of political power, cultural legitimacy, economic development, and social hierarchy. Latin America's cities have stood at the nexus of regional and transnational forces. They have served as both geographic and intellectual meeting places, where vibrant and often restive rural cultures have come into contact with forces that reach well beyond the boundaries of the nation-state. As a result, scholars across the disciplines have long grappled with how to understand urban space in Latin America. This year's conference theme, "Urban Explorations: Latin America's Cities, Past & Present," explores new avenues of research on the role of cities in Latin America. Deadline for proposals: **February 14, 2014**

The Kings International Development Institute at King's College London—MSc Latin American Development

This programme integrates a thorough grounding in development theory with the in-depth study of Latin America. This region, known for its historically high levels of inequality and its recurrent political and economic crises, has been enjoying a period of democratic consolidation, economic growth, and falling inequality. Through exploring the contemporary and historical experiences of this region students will develop an understanding of the deep roots of social change and the background to current development challenges and policy debates.

The **MSc Latin American Development** highlights the importance of Latin America's position in the global order, as well as the relationships between countries of the region, in shaping countries' policy options and development outcomes. Drawing on the broader expertise within the King's Global Institutes, the MSc will also interrogate how experiences of emerging economies around the world illuminate the issues facing Latin America. The emphasis is on understanding the ways Latin America is trying to overcome long-standing barriers to stability and prosperity.

The focus on integrating theory, data, and history will foster students' critical and analytical skills as they examine how Latin American countries are promoting growth and economic, social and political development in new and often innovative ways.

Volunteers Needed

Birmingham Clinic/ SALUD (Students and Latinos United against Disparities)

I am currently a 2nd year medical student at PittMed and am doing a Schweitzer Fellowship with Birmingham Clinic/ SALUD (Students and Latinos United against Disparities).

We are looking for a couple volunteers who can speak and write in Spanish who are interested in helping us with a few initiatives:

- 1) Developing mini-health talks in Spanish (should take no more than 30min per each one), and
- 2) Be interested in longitudinal follow up care with the Birmingham Clinic Hispanic patients, and more.

We require an intermediate to high level of proficiency in Spanish and in return, are hoping we can provide an enriching experience for the volunteers. All the volunteers will be interacting with the Latino population directly. Please do send this information around as needed.

If anyone has any questions, for more information email: Utsav Bansal at ukb1@pitt.edu.

Casa San Jose is looking for tutors for Kindergarten-age Latino children of immigrants and Latino immigrant children

We are writing with some exciting news about a new program for Latino Children that Casa San Jose is in the process of launching. Casa San Jose's new program, Puentes Hacia el Future (Bridges to the Future) will offer an after-school educational program to Kindergarten age Latino children. We are starting at Beechwood Elementary School. I have spoken with Principal Sally Rifugiato and she is excited for the program to begin. Casa San Jose has received a small grant from the Pittsburgh Child Guidance Foundation to provide snacks and transportation assistance for both students and tutors. The School will provide the materials.

The *Bridges to the Future* program will meet three days a week from 2:50 until 4 p.m. at Beechwood K-5 Public School. The address is 810 Rockland Ave. Pittsburgh, PA 15216. During this time we will provide a snack after which we will separate the group of 17 students into small groups or take them individually if we have enough volunteers. There is a T stop near the school which is convenient to downtown for volunteers who need to use public transportation. There is plenty of parking at the school after the buses leave. The children need support and reinforcement of English language skills, reading and math concepts. We are anxious to launch this program and we're currently recruiting volunteers to tutor the children. Volunteers DO NOT NEED TO SPEAK SPANISH. Please spread the word to your students about this exciting new opportunity to support Latino youth and immigrant families in Pittsburgh. We are trying to start the program ASAP as we have already secured funds to support it. Please have anyone interested in volunteering send an email to casasanjosepittsburgh@gmail.com. They can also call our office at 412-343-3111. Thanks so much for your help!
