

Reacting to the Past Workshop: An Interdisciplinary Classroom Simulation

- Saturday, May 21, 2016
- 4130 Posvar Hall
- 9:00 AM

The deadline to apply is Friday, May 13, 2016

Presenters/Gamemasters:

Dr. David Henderson
Dr. Susan Henderson
Reacting to the Past
Barnard College

Participate in a classroom simulation that relives negotiations on air pollution and acid rain among European nations between 1979-1989.

The international simulation "Acid Rain in the European Environment" incorporates social studies, chemistry, and English content. Students engage in analyzing primary source documents as well as scientific data and graphs.

As a participant in this workshop, you'll learn about the science behind acid rain while understanding the historical context of the negotiations to take back to your classroom. Social studies, science, math and language arts teachers are strongly encouraged to register!

Organizers:

European Studies Center
Global Studies Center
University of Pittsburgh

Breakfast and lunch served
Parking provided
Act 48 hours
Free classroom resources &
materials
