

REFINING YOUR RESEARCH QUESTION WORKSHOP

*Need help developing a
research question?*

Intended for students who have a topic they are thinking about for their undergraduate thesis project but need some help turning it into a research question, this workshop will address the scope of the project, the feasibility of the project, and the knowledge gap to which the project intends to contribute. Students will work in groups to refine their research questions, and can schedule one-on-one meetings with Dr. Lieder for additional guidance. **All students are welcome!**

Students must submit a 300-500 word abstract of their proposed project to apply.
