25833	ENGLISH	ENGCMP 1102	LANGUAGE OF MEDICINE	MW, 04:30 PM to 05:45 PM
	ARTSC	3 Credits	Flynn,April F	CL 219

This course investigates ways in which language influences experiences, understandings, and outcomes in health and medical contexts using concepts and tools from the emerging field of medical rhetoric. Course texts include readings from The Birth of the Clinic by Michel Foucault, Being Mortal by Atul Gawande, On Immunity by Eula Biss, The Cancer Journals by Audre Lorde, Stitches by David Small, and Illness as Metaphor by Susan Sontag. Students will write weekly one-to-two-page reading responses in preparation for class discussions as well as two four-to-five-page reflective/analytical essays and a ten-to-twelve-page final paper synthesizing work on a specific medical rhetoric topic.

29199	HIST	HIST 1706	DRUGS IN GLOBAL HISTORY	W, 06:00 PM to 08:25 PM
	ARTSC	3 Credits	Ladson,Marcy J	CL 142

Drugs, and ideas of what a drug is, have shaped global history since early modernity. This course will chart the emergence of modern bodies and of pharmaceutical modernity as we explore a pharmacopoeia full of global objects acquired both over-, behind-, and under-the-counter, from chocolate and Spanish Fly to Prozac and ecigarettes. By tracing drug history through interweaving histories of music, media, fiction, poetry, and more, we will also be tracing a history of ways in which drugs have helped create ideas of what is "normal."

23961	HPS	HPS 0613	MORALITY AND MEDICINE	Multiple Sections
	ARTSC	3 Credits	Morrow,Katherine H	CL 149

Ethical dilemmas in the practice of health care continue to proliferate and receive increasing attention from members of the health care profession, ethicists, policy makers, and the general public as health care consumers. In this course we will examine a number of ethical issues that arise in the context of contemporary medical practice and research by analyzing articles and decision scenarios. Topics to be covered typically include the physician-patient relationship; informed consent; medical experimentation; termination of treatment; genetics; reproductive technologies; euthanasia; resource allocation; and health care reform. Students who successfully complete this course will be able to identify and analyze different philosophical approaches to selected issues in medical ethics; have gained insight into how to read and critically interpret philosophical arguments; and have developed skills that will enable them to think clearly about ethical questions as future or current health care providers, policy makers, and consumers. This course is part of a core sequence leading to certification in the Conceptual Foundations of Medicine Certificate Program, and is a companion course to HPS 0612 (Mind and Medicine) but may be taken independently. The course is of particular interest to pre-medical and pre-health care students.

22740	PHIL	PHIL 1360	BIOMEDICAL ETHICS	MW, 04:30 PM to 05:45 PM
	ARTSC	3 Credits	Froese.Annika	CL 339

This course will be an in-depth exploration of a number of contested issues related to the practice of medicine, medical research and public health which are of philosophical, professional, and public policy concern. Some topics will include: the moral obligations of physicians and other healthcare professionals, patient autonomy, the definition and determination of death, organ donation, euthanasia and physician aided death, vaccination, and the moral imperatives and constraints distinctive to domestic and international medical and public health research. This course should be of particular interest to philosophy majors as well as to students who are contemplating a career in medicine, biomedical research, public health, or health law. Final papers will be on topics related to students individual interests within the framework of the course. This course is an Approved Elective for the Undergraduate Certificate in Conceptual Foundations of Medicine. Prerequisite: at least one course in philosophy or history and philosophy of science or permission of the instructor.

29674	PS	PS 1555	GLOBAL STUDIES MINI COURSE: Technology,	March 18-20, 2022, to
			Humanity, and Social Justice	
	ARTSC	1 Credits		Online

As humans rely more and more on electronic devices to support their everyday activities, there are ever present warnings about the impacts such reliance has on human autonomy ranging from who owns and controls information networks, the inequitable impact of technology consumption on peoples and places, varying accessibility of technology around the globe, and the promises and limitations of technology in improving human health. By engaging in technology as a lens, this sequence of weekend micro-courses encourages students to examine technology as a system disproportionately impacting humanity by enabling and constraining human rights of groups of people around the globe. With a multi-disciplinary focus, the course invites researchers and practitioners from the University of Pittsburgh, Carnegie Mellon, and relevant fields more broadly. In this four-part weekend micro-course (spanning four semesters), we will examine the power of technology on humanity and its implications on social justice in four areas: governance, environment, education, and health.
